

LogistiHub: A Web and Mobile Integrated Multi-Tenant Platform

A self-constructed survey questionnaire

Calimquim, Collin, Tolentino, Nick Angelo, Alcaraz, Shaun Anilov

Directions: Kindly answer the following statements based on the given Likert's Scale:

5 – Strongly agree, 4 – Agree, 3 – Neutral, 2 – Disagree, 1 – Strongly disagree

Part I: Client (Customer) Evaluation

1. Shipment Creation & Mobile Usability	5	4	3	2	1
I can easily create a new shipment using the mobile application.					
The interactive map makes selecting pickup and drop-off locations intuitive.					
The automated fare estimation provides clear and transparent shipping costs.					
The available shipment categories cover all my delivery needs.					
The mobile application interface is visually appealing and easy to navigate.					

2. Real-Time Tracking & Notifications	5	4	3	2	1
The live GPS tracking accurately reflects the driver's current location without delays.					
Push notifications provide timely updates on my shipment's progress.					
The estimated delivery time aligns closely with the actual arrival time.					
The tracking map interface is easy to understand and interacts smoothly.					
The in-app chat and call feature allows effective communication with the driver during active deliveries.					

3. Payments & Reliability	5	4	3	2	1
Processing payments through the integrated gateway (e.g., PayMongo, GCash) is seamless.					
The proof-of-delivery photo gives me confidence that my package was safely received.					
The system clearly displays the breakdown of charges before I finalize my payment.					
I experience no technical errors or crashes when confirming my payment.					
My personal data and transaction information feel secure within the app.					

** The following section is for Driver respondents only.*

4. Driver Experience	5	4	3	2	1
The OSRM-powered turn-by-turn navigation provides accurate directions that follow actual road networks.					
The proof-of-delivery photo capture uploads successfully and attaches correctly to the shipment record.					

The job accept/decline system allows me to manage my delivery queue efficiently.					
The earnings and statistics dashboard accurately reflects my completed deliveries and total earnings.					

5. Overall Satisfaction	5	4	3	2	1
Overall, the app makes sending or receiving packages more convenient compared to traditional methods.					
I consider the LogistiHub platform reliable for handling sensitive or high-value shipments.					
I would recommend the LogistiHub app to friends or colleagues who need delivery services.					

Open-Ended Questions:

1. What feature of the app did you find most useful?

2. What improvements or additional features would you like to see in future versions?

LogistiHub: A Web and Mobile Integrated Multi-Tenant Platform

5 – Strongly agree, 4 – Agree, 3 – Neutral, 2 – Disagree, 1 – Strongly disagree

Part II: Tenant (Logistics Company) Evaluation

1. Platform Management & Data Isolation	5	4	3	2	1
The web dashboard provides a comprehensive overview of our daily operations.					
The system reliably isolates and secures our company data from other tenants.					
The custom branding options accurately reflect our unique company identity.					
Managing user roles and access permissions within our tenant space is straightforward.					
The onboarding process for registering and setting up our company workspace was efficient and straightforward.					

2. Dispatch & Fleet Management	5	4	3	2	1
The system effectively prevents dispatch errors by enforcing vehicle-type compatibility.					
Monitoring driver locations through the 10-second GPS polling is reliable and smooth.					
The OSRM-computed routes provide accurate and efficient directions for our drivers.					
Assigning shipments to available drivers is a fast and organized process.					
The driver application allows our staff to update delivery statuses quickly in the field.					

3. Administration & Billing Integration	5	4	3	2	1
The automated fare computation accurately applies our specific fuel, weight, and distance rules.					
Managing subscription renewals and tracking revenue via the integrated gateway is efficient.					
The audit logs provide transparent and easily accessible records of system events.					
The platform generates accurate financial summaries for completed transactions.					
The system accurately enforces resource limits based on our subscription plan (e.g., vehicle count per plan tier).					

4. Overall Satisfaction	5	4	3	2	1
Adjusting operational parameters (e.g., base rates, vehicle capacities) in the system is easy.					
Notifications and shipment status updates are delivered promptly when changes occur.					

Overall, the platform helps us manage logistics operations more effectively than manual or paper-based methods.					
The platform provides sufficient features for our daily logistics operations.					
I would recommend LogistiHub to other logistics companies.					

Open-Ended Questions:

1. What feature of the platform did you find most useful for your operations?

2. What improvements or additional features would you like to see in future versions?
